

ENVIRONMENTAL POLICY

General Crane Services recognizes its obligation to customers, staff and the general public in regard to minimizing adverse environmental impacts resulting from its operations.

The company is committed to continuously improving performance through an environmental management system based on planning, performance monitoring and through review process.

General Crane Services will:

- Establish and maintain an environmental management system based on ISO 14001:2015;
- Identify those of its operations with the potential to adversely impact on the environment and determine through planning and operational control to minimize the extent and severity of such impacts;
- Reduce and where possible eliminate harmful waste and pollution from our Office facilities and sites to where our machinery visits;
- Dispose of all harmful waste and or by products in accordance with approved methods when appropriate;
- Where applicable comply with all Federal and State Government environmental legislation; and
- Provide a framework for achieving environmental objectives and targets.

It is the policy of General Crane Services' management to develop and instigate systems of work in appropriate areas that reflect the company's goals in reducing any adverse environmental impact on both the local community and the global scale.
